

▶ **PRECISION BUILT FOR EASY INSTALLATION AND DURABILITY**

▶ **MEETS OR EXCEEDS OEM STANDARDS**

BEARINGS AND HUB BEARING UNITS

All bearings come with **premium quality Chevron Grade 2 molybdenum grease**

Multi-lip seals are made with Nitrile rubber (NBR) which can successfully function at temperatures of **-35°C** while **resisting contamination** from fluids and debris

Inner rings are made of **AISI 52100 alloy (high carbon) steel, low-alloy chromium steel,** which meet **ASTM International quality standards**

Manufactured with **CNC tooling, automated grinding and assembly lines** for **increased consistency**

Made of **high tensile, heat-treatable AISI 1065 high-carbon steel**

Meet automotive-industry **TS16949 quality certification standard**

All bearings are **individually tested for maximum quality and durability** exceeding industry standards
