PREMIUM QUALITY DRUMS & ROTORS

G3000 CAST IRON

Giving our rotors the ideal balance between tensile and hardness.

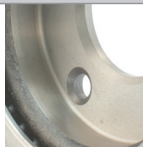

DOUBLE DISC GROUND FINISH

Eliminating lateral run-out on friction surface and DTV (Disc Thickness Variation) issues.

MILL BALANCED

For a smoother braking application and vibration reduction.

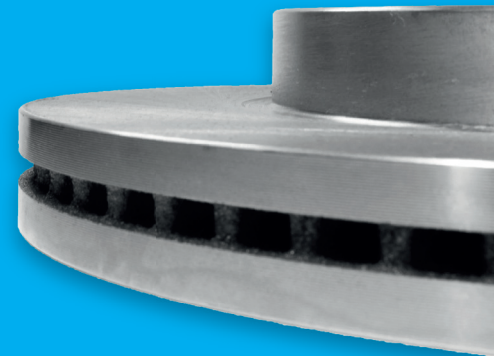

IATF 16949
QUALITY
STANDARD

VENTED ROTORS

OE style vane configuration provides more efficient heat dissipation, reduces vibration that can cause noise, and extends rotor life.

MANUFACTURED WITH MULTIPLE ALLOYS

for improved heat dissipation and performance
